

Imperial College of Science, Technology and Medicine
Department of Computing

Learning Disentangled Representations of Complex Scenes with Convolutional Variational Autoencoders

D. G. Sherburn

Submitted in part fulfilment of the requirements for the degree of
Master of Engineering in Joint Mathematics and Computing
of Imperial College, June 2017

Acknowledgements

I would like to express (whatever feelings I have) to:

- My supervisor
- My second supervisor
- Other researchers
- My family and friends

Chapter 1

Introduction

1.1 Motivation and Objectives

A long term goal of artificial intelligence (AI) is the development of artificial general intelligence (AGI). A number of theoretical frameworks have been presented as formalizations of what it means to achieve AGI, notably by [Hut05].

1.2 Contributions
